

INNOVATECH

INNOVATIVE TECHNOLOGY SCM- SOCKS CLEANING MACHINE

Sock Loading / Cutting Unit

4 different socks reversing alternatives (optional)

- back to front,
- back to back,
- back to front,
- back to back)

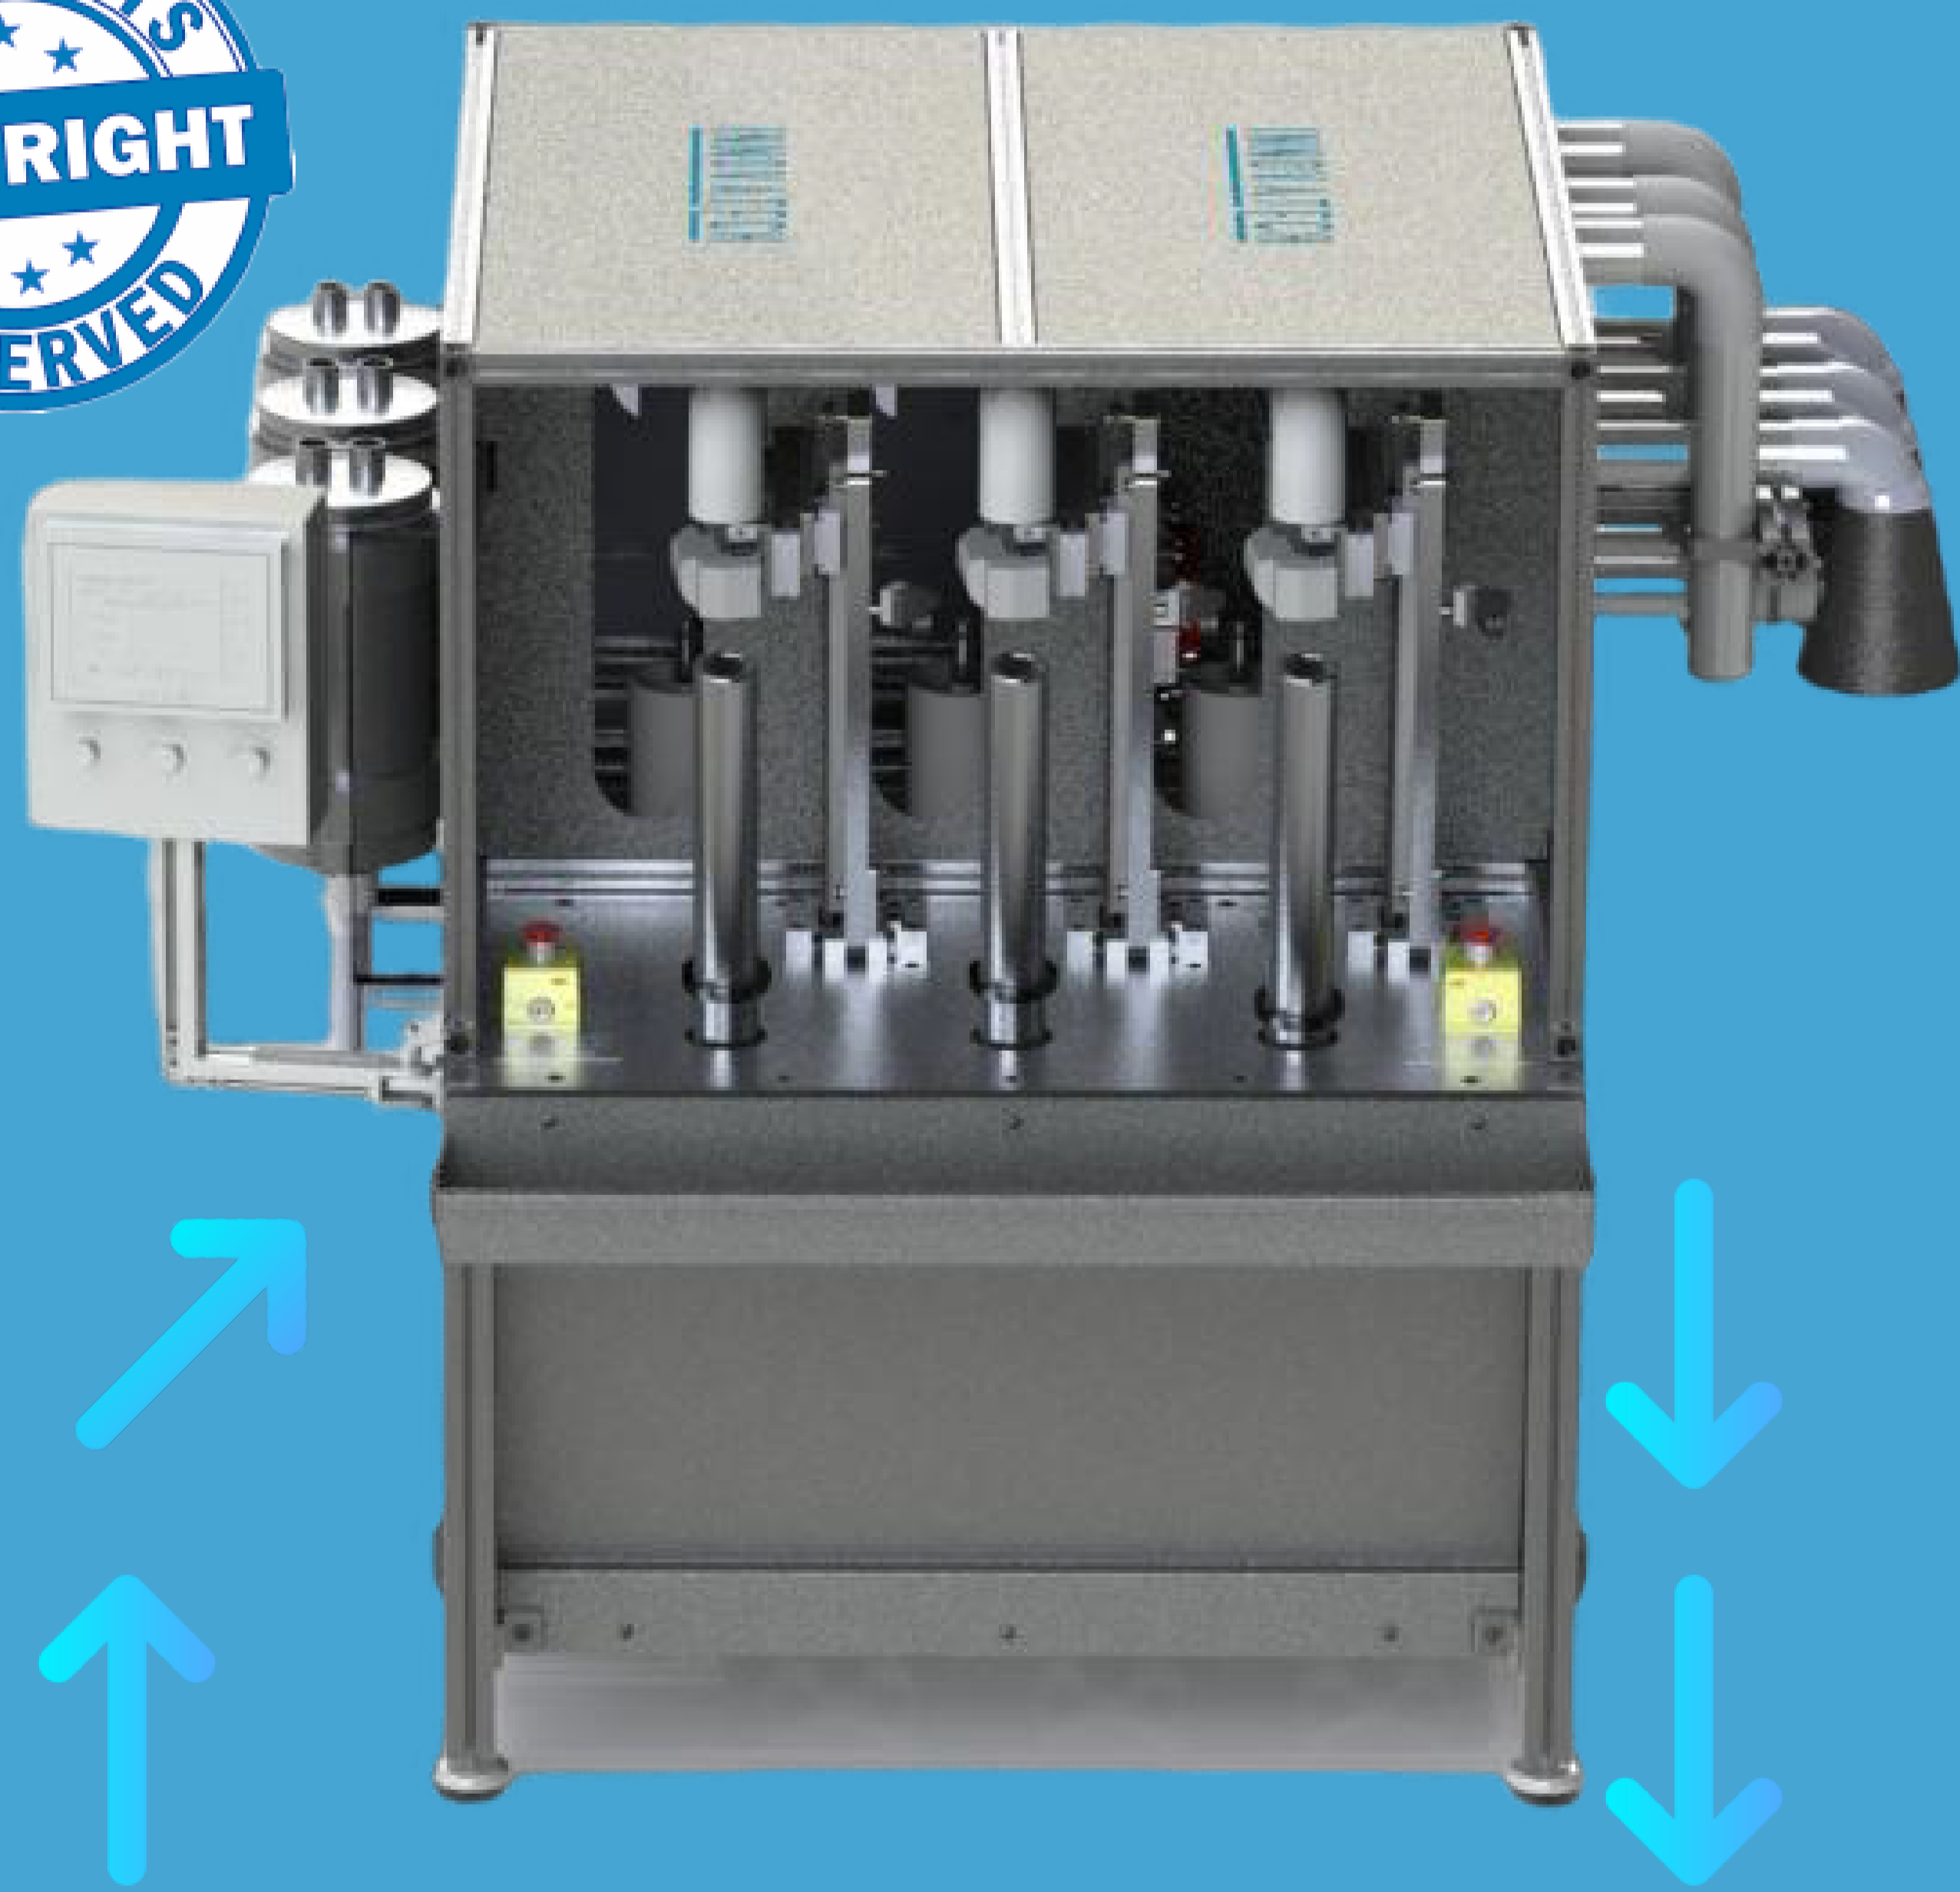

Shave machine

SCM-32

Socks cleaning and reversing machine; this machine has been produced for cleaning the long yarn pieces on the socks and reversing them finally.

As you know long yarn is a problematic issue for product safety. Customers don't accept the long cutted yarn inside of the socks.

Cleaning cutted threads inside of the socks are extra cost for your production. When you use the SC32 you can reduce the labour costs dramatically also standardizing quality. only one SM32 you can gain 4 workers costs at the shift for your plant. (2 workers for cleaning, 2 workers for reversing)

Additionally you will guarantee the requested cutted threads around of the socks. You can reach the high quality level with your socks.

TECHNICAL CHARACTERISTICS

- Three loading units in one machine.
- Maximum socks length is 325 mm.
- Electrical consumption is 1,2 kwh per hour.
- Requested air pressure is 6 bar.
- Requested air vacuum min. 120 mbar for each unit.
- Ergonomical design. (standing and sitting alternatives)
- Servo controlled socks length.

- User friendly software on the plc.
- Programmable cleaning tour.
- Adjustable turning speed.
- Two emergency stops.
- 25 different recipes in the data bank or unlimited data entering by manual mode.
- Dimension of the machine w 165 x L 135 x H 140 cö.
- Weight of the machine 290 kg.
